Export Capabilities of Iranian Companies in the Petroleum Industry

DESIGNED-2024

Export Capabilities of Iranian Companies in the Petroleum Industry

(products, technical and engineering services)

DESIGNED-2024

Ayatollah Sayed Ali Hosseini Khamenei
Supreme Leader of the Islamic Republic of Iran

"Extensive interaction with other countries should be one of the government's strategies. This is exactly the opposite of what the enemies and brokers are looking for. We can effectively communicate with the world, assist other countries and governments, and receive assistance from them."

Dr. Sayed Ebrahim Raisi
President of the Islamic Republic of Iran

“We should be proud of our country’s oil industry, which does not depend on foreign experts. The ability of oil industry experts has reached such a point that as a powerful and technological country, it offers technical and engineering services to other countries, particularly those experiencing oppressive sanctions from colonial regimes.”

Javad Owji
Minister of Petroleum of the
Islamic Republic of Iran

Vahidreza Zeidi Fard
Deputy Minister of Petroleum for
Engineering, Research and Technology

Mohammad Esmail Kefayati
Head of the Petroleum Industry
Innotech Park (PIIP)

Ahmad Asadzadeh
Deputy Minister of Petroleum for
International Affairs and Trading

Mohsen Khojasteh Mehr
Deputy Petroleum Minister
and the CEO of the National
Iranian Oil Company
(NIOC)

Majid Chegeni
Deputy Minister of Petro-
leum & CEO of the National
Iranian Gas Company
(NIGC)

Morteza ShahMirzaei
Deputy Minister of
Petroleum & CEO of
National Petrochemical
Co. (NPC)

Jalil Salari
Deputy Minister of
Petroleum & CEO of
the National Iranian Oil
Refining and Distribution
Company (NIORDC)

Introduction:

-The petroleum industry of the Islamic Republic of Iran, beyond 115 years of luminous background, is considered as one of the most significant international industries in the world.

- Iran is pioneer in the world in terms of reserves and hydrocarbon resources (including oil and gas).

- Iran has great potential in the field of human resources and supply of experienced and fully self-sufficient specialists and managers. There by more than 90% of EPC/EPD, ... projects are led and managed by internal experts.

- It is noteworthy that currently all oil related industries repairs and maintenance are done by domestic experts and companies with low cost inside the country. Furthermore, above 80% of the requirements of goods, equipment and consumables are supplied by domestic manufacturers and companies.

- Iran hold upstream, midstream and downstream petroleum industries, encompassing all phases of exploration, extraction, refining and distribution, transmission (oil, gas and petroleum products), various types of hydrocarbon transformations and petrochemical industries. The four main companies of the Ministry of Petroleum, including National Iranian Oil Company, National Iranian Gas Company, National Iranian Petrochemical Company and National Iranian Oil Refining and Distribution Company are accountable for all these phases.

-More than ten Non-Governmental Organizations (NGO) cooperates in Iran's Petroleum industry. The most important ones noted as follows: - Iranian Petroleum Institute - Iranian Petroleum Industries Equipment Manufacturers Association - Association of Petroleum Industry, Engineering and Construction Companies - Association of Exploration and Production companies

- The petroleum industry of the Islamic Republic of Iran consist of the most complete ecosystem of technology and innovation in the country, which includes education (Petroleum University of Technology), research (Research Institute of Petroleum) and Petroleum Industry Innotech Park (Executive/government Park). All mentioned provides many scientific, technological and research services to the petroleum industry.

- Iranian Petroleum Standards (IPS), customized by experts based on American Petroleum Institute (API) standards, local conditions and experiences, are the basis of operational, technical and engineering work in this industry.

- In the field of value chain of petrochemical units, large petrochemical companies are active in Iran. For instance, Persian Gulf Holding is the largest petrochemical holding in the world.

- In Iran, more than 2,500 companies are in the Approved Vendor List (AVL) of the Ministry of Petroleum, and approximately 500 other companies provide specialized services to the Petroleum industry.

- In conclusion, it is worth mentioning that one of the achievements and honors of the Petroleum Industry of the Islamic Republic of Iran is survival, dynamism and self-sufficiency in the worst conditions of sanctions, which distinguishes this industry among the world's Petroleum Industries.

ROTATING

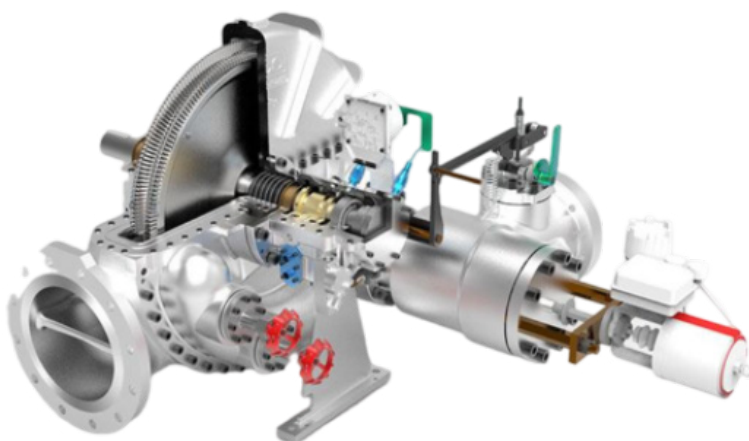

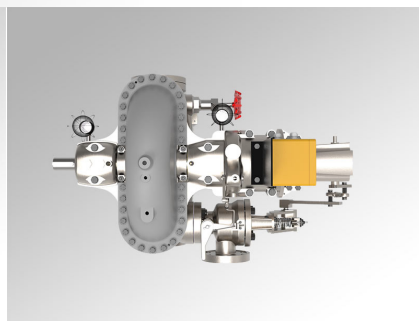

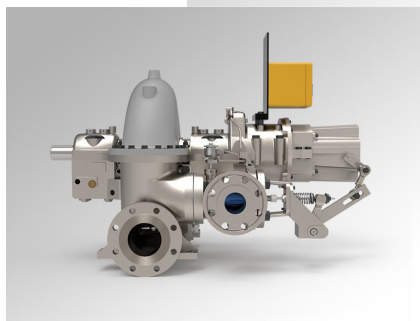

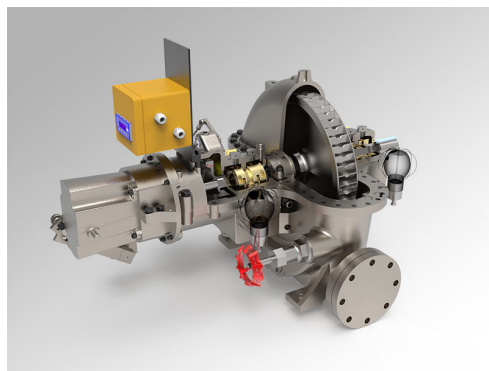

Company ID	10260263835
COMPLETE Company Name	Baron energy & technology Development Group
Category of Product	Rotary Equipment- Compressor unite and air separation, dryers, N2, CO2 and CNG packages
Products	Air & Gas, Utility & Process Reciprocating Compressor (upstream-downstream) Industrial gas packages

Foolad Paya Eng. Company (FPEC) is a famous Iranian company founded in 1995 by investment of ASCOTEC GmbH Germany and private sector for design , engineering & manufacturing of oil ,gas ,petrochemical ,steel & mines industries in Ahwaz , Khuzestan province. A German shareholder bring much opportunity & possibilities for providing western first class technology & know how. Using of first grade worldwide technology provider with cheap local partner , FPEC, as a manufacturer of different equipment's Was a good reason of fast growing up of co. which was happen very soon by establishment of the second well equipped workshop in ISFAHAN in 1997. With mentioned two workshop we are able to cover vast demands of inside of Iran & also servicing for abroad, especially near Persian Gulf.

FPEC is manufacturer of pressure vessels, Storage tanks, K.O drums, towers, heat recovery systems, static & structural parts, stacks, material handling systems.

FPEC activities expanded in the EPC projects because of a very good supporting of workshops as qualified & on time manufacturer.

After execution of many projects, FPEC is a famous company for three major types of activities, at first as manufacturing Co. & secondly as Consortium partner in the EPC projects& finally renewing plants & development of old plants.

QA/HSE/Environmental in FPEC are very important and we have got below standards for assure our system to keep quality of system & product as well as safety & environment.

ISO 9001:2008 ,ISO 18001:2007,ISO 14001:2004,ISO 10002:2004,ISO 10004:2010

FPEC is in the approved vendor list of many private and governmental Oil & Gas companies such as NIOC National Iranian Oil Co's , NIOSC, National Iranian Oil South Co. ,NPC, National Iranian Petrochemical Co., Falat Ghareh Co. I.O.O.C ,NIDCO National Iranian Drilling Co., POGC , Pars Oil & Gas Co. etc.

In steel, mines & metals Industries we are in the approved vendor list of most Iranian Co's Such as NISCO, IMIDRO, K.S.C, MSC, HOSCO, S.K.S and etc.

We here by invite you & your esteemed Co. to visit our workshops , finished or under operation plants & in the progress plants. You are always welcome.

About Company	<p>products and services</p> <p>Pars Regulator Corp. PJS (Private Joint Stock) is a knowledge-based manufacturing, supplier and official. agent since 1988 in Iran Head office located in Tehran, the capital of the country. PR (abbreviation of the Pars Regulator has eight production, office and warehouse facilities with a total area of 45,000 sq. meters of land. Originally PR Corp. manufactured LPG regulators, later it became a manufacturer of strainers and filters, instrumentation tube fittings, forged steel pipe fittings, high pressure valves and manifolds, vessels, specialty fabricated products, chemical materials and etc. Due to wide range of PR products and for more information, please check our website www.parsregulator.com or contact us. Our foreign commercial department is active in import and export of many kinds of filters, tubes, pipes, industrial equipment and machines and various other industrial products. We currently have exclusive agency / agreements with the Italian Loxeal Co., Taiwan Grace Filter Co., SIP Stard Valve Co. and other famous brands.</p> <p>PR has been serving customers in local markets, European Countries, Turkey, Bangladesh, Algeria, Qatar, Iraq, Oman, Sudan and other countries around the world.</p> <p>PR is the member of "Approved Vendor Lists" (AVL) of major national and private Iranian oil and gas refineries, petrochemical, steel mills and power plants such as MOP (the IR Ministry of Petroleum), NPC (National Petrochemical Co.), NIGC (National Iranian Gas Co.), Mapna Group PJS Co., POGC (Pars Oil & Gas Co.), NIOPDC (National Iranian Oil Products Distribution Co.), MSC (Esfahan Mobarakeh Steel Co.) and so on.</p> <p>We have a considerable customer base with thousands successful projects from big to small, in a variety of industries such as petrochemical facilities, oil & gas refineries, EPC companies, facilities, oil & gas refineries, EPC companies, power plants, steel mills, automotive and others. We buy bar stock and other required raw materials direct from the qualified mills, then in our own manufacturing facilities we control, cut, forge, machine, sandblast, electro polish, weld, assemble and test among other processes.</p> <p>That's why we can control the maximum number of variables to ensure product quality. High quality according to international standards is our permanent commitment. We have an R&D department includes many experienced engineers and in all have more than 300 employees. We have succeeded in capturing our customers' faith and trust by being one of the bests in quality, reliability, customer satisfaction and stellar after-sales services with competitive prices.</p> <p>Our values are the base of our culture. They shape what we do, guide our behavior and interactions with our colleagues, clients, partners, society and nature as well. In brief our values are commitment, respect and care, optimizing and to be dynamic.</p>

About Company	<p>Petroleum Equipment Industries Company (PEIC) is working as a holding Company with the aims of investment in designing, engineering, manufacturing and services related to the following fields: Wellhead Equipment and X-Mas tree and other accessories for the off-shore/on-shore all exploration and pressure rating up to 15000 PSI. Industrial Valves various type of Ball, Gate, Globe, Check, Butterfly, Through Conduit Gate Valve, MOV, ON-Off and control valves up to 56 inches and pressure rate up to 2500 & API 6A up to 15000 PSI. Wide variety of industrial Fitting and Flanges in form of forged and welded types and cover all types materials through various sizes from ½ to 132 inch and different working pressures from SCH 10 to XXS.</p>
Company History	<p>PEIC was primarily established by Industrial Development and Renovation Organization (IDRO) in 1991 but gradually got privatized till 2010. At present this company as one of the subsidiaries of Ahdaf Investment Co. with about 30 years of experience consists of 4 subsidiaries: Wellhead Equipment Technology Company, Gostaresh Shir sazi Tehran Sufa Company, Pars Pangan Company and Toos Peyvand Company and is manufacturing various types of high-tech wellhead equipment, industrial valves, steel fittings and flanges for oil, gas, petrochemical refinery and power plant industries based on international standards API, ASTM, ASME, BS, etc.</p>

About Company	<p>PSPP is a leading Iranian company in the field of wellhead and X-mas tree design and production. The reputation of PSPP among oil drilling companies is based on its capability to design and produce different wellhead configurations, including ESP/SRP, Unitized/Compact, Dual/Splitter and Horizontal wellhead systems. PSPP has started exporting its products overseas and aims to expand its international market. PSPP also possesses a complete PDC drill bit production line and currently holds a prominent position in the Iranian drill bit market. The utilization of Western-based design and manufacturing technology, coupled with competitive pricing, represents two significant advantages for PSPP in the PDC drill bit market. It strengthens PSPP position favorably for expansion of its international market in the near future.</p>
Company History	<p>PSPP was established in 2005 with two primary objectives: Local design & manufacture of wellhead equipment and PDC drill bits. Thanks to a Co-manufacturing agreement with Norwegian Aker Solutions, PSPP received a comprehensive package of wellhead design knowhow and manufacturing technologies, enabling the successful production and delivery of wellhead equipment valued at over US \$50 million to public and private oil companies. This equipment included Conventional, Semi-Compact, ESP, and Dual Wellheads, as well as X-mas trees. Presently, PSPP has acquired full capability of design and production and performs as a trustworthy solution provider to any task received from wellhead market. PSPP has also established a business cooperation with American Reed-Hycalog (currently known as NOV). Through this collaboration, PSPP received the complete package of design and production knowledge and co-manufactured and sold over US \$10 million of different types of high performance PDC drill bits to the local market so far.</p>

About Company	This company's activities include manufacturing the wellhead and x-mas tree equipment, supplies needed for the drilling and exploitation of oil and gas wells, and the installation and commissioning services relying on technical knowledge and skilled human capital.
Company History	WETCO Company started designing and manufacturing the equipment with the cooperation of the ABB Company. In 2005, ABB Company devolved its oil and gas sector to Vetco Gray Company. In the summer of 2006, due to the sanctions, the Vetco Gray Company sold 100 percent of its shares, and the company's name changed to Wellhead Equipment Technology. This cooperation was based on the transfer of technical knowledge and personnel training.

About Company	<p>Ekbatan Gas Control Knowledge-based Company is one of the largest manufacturers and exporters of safety equipment, regulation and measurement of gas and water, and one of the leading manufacturers of automobile parts and assemblies in Iran.</p> <p>Ekbatan Gas Control Company is a leading manufacturer of accurate control and measurement equipment for gas, water and car parts with the benefit of creative employees and superior technologies in casting and machining industries with the aim of providing domestic and foreign markets and respecting the interests of all stakeholders.</p> <ul style="list-style-type: none"> • Excellent in Die-casting, machining and assembling technology and knowledge of metering, safety and related industries. • Gaining a good market share and brand name in the Middle East. • Complete portfolio of products and services in the Casting industry, Metering and Safety products.

Company History	<p>Ekbatan Gas Control Knowledge-Based Company (Public Joint Stock) is a large manufacturer and exporter of safety equipment, regulators, and domestic gas meters in Iran and the Middle East. The company was established in 1983, aiming to (meet) the national policies relating to development of the nationwide gas distribution network and meet the needs of the National Iranian Gas Company (NIGC) and the affiliated provincial gas companies to the previously mentioned equipment entered the oil and gas equipment market as a designer and manufacturer of domestic gas regulators. Utilizing experience and technical knowledge of the staff and corporation resources, the company has always played a leading role in localization, innovation, development and improvement of oil and gas industry equipment. Currently, different types of domestic gas regulators in 5-160 m³/h capacities, as well as steel and aluminum domestic gas meters are produced in this industrial unit. Considering the government's intention to reform the energy consumption pattern, and the country's urgent need to up-to-date domestic gas metering equipment for efficient gas consumption management, Ekbatan Gas Control Co. started design and production of smart remotely reading domestic gas meters, using the latest communication technologies, such as LORA and NB-IOT. The company has also put production and localization of the new generation gas meters, known as ultrasonic meters (UGM) into agenda.</p> <p>Besides producing safety and domestic gas metering equipment, Ekbatan Gas Control Co. pays specific attention to testing and calibration of these products, and produces a wide range of new-generation testing and calibration equipment and regulators used by quality control laboratories as well as testing and calibration centers. The company is also the exclusive producer of portable domestic gas meters used for on-site testing and troubleshooting of the subscribers' gas meters. Relying on the great capacity of producing die-cast products and the existing machining and assembly lines, the company started producing automotive parts in 2004, besides production of oil and gas industry equipment. Currently, a wide range of automotive parts are produced and supplied to the major domestic automotive industries under "Ekbatan Part" brand. This industrial unit utilized the existing technical capacities to set up a multi-jet domestic water meter production line in 2017, in order to enter the water metering industry and complete the company's metering products portfolio. Products of this production line are available under "Ekbatan Water Meter" brand.</p>
CEO Name	Eng. Mohammad Reza Jafari
Addresss	3 rd km of Sardar Hamedani Blvd., Hamedan, Iran
Sales Refrences	IGC, Provincial Gas Companies, Water & Wastewater Companies, Mega Motor Co, etc.

Company ID	14004360907
COMPLETE Company Name	Tamin Petro Kala Qeshm
Category of Product	Nano and advanced materials
Products	<p>- Produce Ceramic & Non-Ceramic Particles (Nano Particles) such as Diamond, Gold, Silver, TiO₂, SiO₂, Copper, Lead & etc.</p> <p>- Nono Diamond Oil Additives/enriched Oil with Nano Particles,</p> <p>- Fuel Tanks Fire & Explosion Prevention Services,</p> <p>- Strengthening the color and coating of equipment against all types of physical and chemical corrosion, heat and UV with nanoparticles</p> <p>- Cool nano fluid (nano diamond water) with high cooling coefficient for closed circuit cooling systems</p> <p>- Production of auto and industrial batteries and battery raw materials,</p>

Cell Phone NO	+98-912-1495429
About Company	<p>Some of the achievements of TPKQ:</p> <p>1- Refining Ceramic and non-ceramic nanoparticles: Production of Nanoparticles of Gold, Silver, Diamonds, TiO₂, SiO₂, and so on, according to order.</p> <p>2- Production of oil Nano additive for various types of Industrial Equipment and combustion engines: optimized with ceramic particles (reduction of friction, reduction of corrosion, reduction of heat, reduction of noise, smoother and smoother operation of the engine, smoother start especially in cold mornings, reduction of fuel consumption, increase of lubricant life).</p> <p>3- Production of painting and coating additives: optimized with ceramic particles (anti-UV, resistant to chemical and mechanical corrosion, hydrophobic and anti-moss).</p> <p>4- Cooling fluid production – Cooling Water: optimized with ceramic particles suitable for CCTV cooling systems,</p> <p>5- Fuel Tanks Fire & Explosion Prevention Services,</p> <p>6- Production of auto and industrial batteries and battery raw material,</p>

Company History	Tamin Petro Kala Qeshm Ltd. (TPKQ) was established in 2014. TPKQ started its activities in the field of supplying equipment required by industries, especially oil, gas, and petrochemical industries. TPKQ, with its experienced staff, has the efficient experience and appropriate scientific and executive support, in addition to providing equipment in the field of industry, is one of the companies active in the production of ceramic and non-ceramic particles.
CEO Name	Masood Faraji
Addresss	Persian Gulf Biotechnology Park, 15 km of South Coast Road, Qeshm Island, Hormozgan
SALES REFERENCES	Oil, Gas, Power Industries & Transportation

Complete Company Name	Nasim Hamrah Industries Co.
Category of product	Oil and gas well logging company
Products	<ul style="list-style-type: none"> - Production Logging Tools (PLT and MPLT) - Free Point Indicator tools (FPIT) - Memory Piezo and Quartz Gauges (MQG and PRM) - Measurement and logging while drilling (MWD and LWD)
